

Seller Information

The professionals at Tax Credits International, Inc. are Film Tax Incentive Experts and Placement Specialists. We have successfully executed over 2,000 transactions, placing in excess of \$1 Billion in various state tax credits since 1998. We work closely with State Film Commissions, Departments of Revenue, and Legislators to ensure that each program is the best that it can be. Because of our extensive experience with states that offer transferable tax credit programs, we are able to quickly and efficiently monetize earned tax credits for production companies.

Our goal is to simplify the tax credit process, from inception to closing. We have strong relationships with major corporations, who are annual multi-state tax credit buyers. This is the cornerstone of our success, and why we are confident in our ability to quickly place your film production credits at the highest price possible, with little to no disruption to your business. Our professionals handle every aspect of the transaction until your tax credits have been fully monetized. We identify your buyer early in the production process and obtain a buyer commitment so you can budget with confidence. Our prices are firm, and always “on the table” with no hidden fees or costs.

Once documentation is complete and executed, we file all of the necessary paperwork with the appropriate state agency and monitor your progress throughout the entire process. Our proven system ensures rapid, reliable payment after state approval is obtained. Procedurally, the production company files a “final accounting” after the project wraps. This report, which highlights those expenses to which the tax credit extends, otherwise known as “qualified expenses,” must be verified by an outside CPA. The Film Office and/or Department of Revenue, reviews the report and issues the tax credit to the production company. Because Tax Credits International authorizes the Film Office/DOR in advance to initiate the transfer, the final transfer is usually done very quickly. The moment our office is notified that the transfer of the credits has been approved, we initiate the movement of funds into the production company’s account. In summary, Tax Credits International, Inc. does all the work, leaving you to your business. For more information, visit Tax Credits International’s website at www.taxcreditsint.com or call us at 787.525.8050.

We look forward to meeting you and becoming a part of your production finance team.
